## About

Antičević-Zeleni Med is registered for production, trade and services, import and export, with homogenised food supplements, dietetic food and cosmetics production as its main activity. Director Claudia Antičević founded the company in 2009. In 2010, four products were registered as dietary supplements by the Ministry of Health in Zagreb, which are called the Line of Green Health; Green Honey, Green Honey Drops, Green Aloe and Green Propolis are included. Two more products were registered in 2012 – Honey with black cumin and Cleansing Tea - as dietary supplements by the Ministry of Health in Zagreb. Furthermore, Antičević Cream was tested by Hamilton Institute and registration followed in 2016. Honey is the result of a long family tradition – the love for plants, apitherapy and phototherapy began with Mr. Pere Antičević and was passed on to his daughter – the company's current owner.

### Product **Antičević Green Honey**

**About** A healing product with royal jelly and alcohol-free propolis, eco fresh broccoli and young wheat, with acacia honey base. Free of artificial colours, preservatives, additives, and added sugar. Suitable from one year of age, and for treating and preventing many chronic diseases.

**Transport packaging dimension**

13 cm x 10,5 cm x 17 cm

**Transport packaging weight** ca. 1 500 g

**Available quantity** 5 000 monthly

## About

In this time of globalization, GMO food, abundance of pesticide-treated fruits and vegetables, and new and fast ways of cultivation, Aronia Live has decided to return to ways of the past. The team grows plants and makes products in an absolutely natural way, like our ancestors did. The intention is to create a world of aronia (chokeberry) with a wide range of healthy products. The company currently owns one of the largest plantations of chokeberry in Croatia. It is situated in the vicinity of Ivanić-Grad and spreads over 18.6 hectares. The plantation is completely fenced and video surveyed. It contains an artificial lake and drip irrigation. The workers never use pesticides or other polluting substances. In other words, the chokeberries are 100% organic and the Austria Bio Garantie certificate confirms this. The team would like to encourage others to recognize the value of biological cultivation and production, since the greatest reward is the abundance of healthy products, as well as customers' trust.

**Product** Bio Chokeberry Capsules with Bio Curcuma  
Bio Chokeberry Capsules with Bio Garlic  
Bio Chokeberry Capsules with Bio Acerola

**About** Curcumin (an active substance within curcuma) has a curative effect even when used in small dosages. Curcuma is known as the 'Golden spice with a thousand names' and is full of iron, manganese, potassium, vitamin B6 and dietary fibre. When chokeberry and curcuma compounds act together, they can stop the spread of malignant cells.

Garlic is an antiviral, antibacterial and fungicidal antioxidant. Diabetes, cancer and heart disease patients may benefit from it. Garlic helps with the normal functioning of heart and blood vessels by lowering the level of bad cholesterol and blood pressure while stimulating circulation.

Acerola is an antioxidant and one of the richest natural sources of vitamin C, even richer in vitamin C than oranges or lemons. Vitamin C helps the immune system and reduces fatigue and exhaustion. The usage of this vitamin is particularly important during the cold and flu season.

## About

Uje is the first Croatian company of this kind, whose mission is to promote top Croatian edible olive oil. During the last couple of years, it has become the leader for olive oil promotion and sales, as well as for related delicacies. The offer is very rich and it represents the best selection in this branch of the Croatian gastro-scene at the moment. The delicacies include jams, tapenades, biscuits, candied fruit and other products for sale or distribution in fine food stores. They are divided into several different brands: Brachia, Nona, Uje Selection and Aroma Mediterranea. The Brachia brand was launched in 2006 as a first class Croatian product. Thanks to numerous awards, the brand has become a synonym for top-quality olive oil. Brachia is created in the olive groves on the Island of Brač and the oil is obtained from the indigenous cultivar Oblica.

## About

Good Spirit liqueurs are produced in the hilly part of the Medimurje Region, and use only natural ingredients and no additives, dyes or chemical substances. The Good Spirit story is based on a long-standing tradition of brandy and liqueur production in the Upper Medimurje Region. Although the company was founded in 2016, its owners have almost 20 years of experience in liqueur production. The company uses the highest quality distillery equipment made in Germany (Müller Brennereianlagen GmbH). This equipment uses quadruple distillation to produce a top quality alcohol. The base for all the liqueurs is obtained from wine which gives a superior quality distillate, compared to alcohol from grapes and pomace. The wine distillate is then macerated and enriched with various natural ingredients. Final products are characterized by atypical flavours, a nice fragrance, beautiful colours and clarity.

## About

Vegetariana is one of the first food companies in Croatia to produce veg-an and vegetarian foods. In business for over 20 years, the company has become a trusted and accepted, as well as established brand with excellent quality products. The vision was, and still is, to create top quality products which encourage their users to implement healthy nutritional habits in their everyday lives, thus promoting ecologically conscious business practice and life in general. In 1996, the company produced its first vegetarian spreads and other vegetarian fillings and that was how the line of Vegetariana brand first started. The vision was on its way of being fulfilled. To this day, Vegetariana continues to inspire its customers in choosing and acquiring healthy nutritional habits and the mission has stayed the same: to be innovative and to meet consumers' expectations. This relationship is developed on the basis of mutual trust through the production and consumption of quality products, while exceptional taste remains one of Vegetariana's main goals.

About

This company has existed for 25 years in the Croatian region of Southern Dalmatia. Its main business includes trade of agricultural goods, seeds, heavy-duty machines for agriculture, and protective products for plants. In 2008, they established a 17. 07 hectare vineyard. Poljopromet has 125 000 vines of grapes, mostly Plavac mali and Pošâip (domestic autochthonous varieties). Production is organic and the company owns an Eco certificate. They produce 70 000 bottles per year, mostly the red wine Plavac Mali and the white wine Pošip. The wine is called Terra Madre and is of premium quality. It obtained an Eco certificate in 2013 and a golden medal at the Dubrovnik FestiWine in 2014. Retail trade includes Opuzen, Metković, Imotski, Vrgorac, Dubrovnik, Smokvica, Split and Rogotin, while wholesale trade includes Rogotin and Split. The company's current production is 600 hl.

## About

This company wants to bring traditional Croatian desserts back to life. It all started with family recipes, Mediterranean ingredients, and manual production. The entire offer includes handmade delicacies and confectionery. Customers can taste the nearly forgotten pepper-and-honey biscuit (paprenjak), fig cake (smokvenjak) mixed with lavender, almonds, oranges, and carob. These are among the most unique and delicious delicacies in the Croatian tradition, handmade from a unique blend of the local ingredients mentioned above, offered as biscuits, chocolates and jams. The production facilities are modern, thus meeting world market demands by producing larger quantities of products as needed. Our wide assortment includes delicious pralines, unique and unusual Turkish delight (lokum) flavours, but also pickled vegetables, ajvar (a roasted pepper dip) and liqueurs.

## About

PIP is a responsible and innovative company specialized in beekeeping. The company started as a family tradition of beekeeping in 1930, making it the oldest private bee product producer in Croatia. They have always paid attention to the quality of their products, and they all bear the Croatian Quality symbol. International ISO 9001 and ISO 22000 (HACCP) certificates are further proof of their high quality. The company processes and enriches bee products in approved facilities and quality control is conducted in their own and in authorized laboratories. Breeding and processing are done in an approved facility, while supervision is conducted in a personalized laboratory, in collaboration with certified institutions. All of PIP's business activities were conducted under the slogan Everything related to beekeeping starts with the bees and, due to innovative access, the slogan between nutrition and pharmaceuticals was added.

## About

Uljara Dobrava produces edible oils (primarily pumpkin and rapeseed oil) and lard since 1995. Mr. Špoljar's work started twenty years ago and his experience as a worker in this company molded him into excellent director. Today, he is the proud owner of the company. Production capacity enlargement is the project of investment in technological resources, with the purpose of creating bigger productivity, better quality and wider capacity in the field of oil processing and manufacturing. One of the goals of this project is opening new markets, preferably abroad, which is the reason for incorporating modern technology.

## About

Protect Pharma, from Rakitovica near Donji Miholjac, is a privately owned family company, successful on both Croatian and foreign markets. They started with agricultural activities in 1981 and with production and product processing in 1989. They recognized the potential of products that were not common in the Croatian region, such as garlic, chamomile, beans, peanuts, and also purchased mushrooms and snails. Protect Pharma cherishes a long tradition in the production of water, fruit and natural juices, syrups, pasta, spices, sauces, food seasonings, bread and bakery products, cakes, biscuits, additives for confectioneries and bakeries, spice mixes, etc. As a business partner, the company guarantees the best certified quality of raw materials and end products. Organically certified processing and drying of vegetables, fruits, oilseeds, cereals, spices and herbs, the development and production of products that have a positive impact on human health are just some of the activities they perform. All processing facilities, agricultural areas, as well as sales, accounting and administration are located in the small Slavonian village of Rakitovica in Croatia.

## About

The core activity of this family business is truffle hunting, preserved as a tradition through three generations, as well as the distribution of their own products made from the Istrian truffle and the finest natural ingredients. During the white and black truffle growth season, they deliver fresh truffles to numerous restaurants and truffle lovers all over the country and the world. The long-standing tradition, the dedication of the whole family and, above all, the passion and love of truffles – those are the ingredients that make these products special and give them their recognizable and irresistible flavours. Another particular reason to enjoy them is the fact that they are 100% Croatian and made in the clean and untouched Istrian nature.

## About

The company Naše klasje was established in 2001 as a Green Field Investment in food production, with the goal of creating, developing and selling innovative products. Business is distributed in two factories and it includes:

- Fresh pasta production
- Production of raw materials for the food industry
- Innovation of production of raw materials for the food industry, using semolina grains without gluten
- Corn
- Buckwheat

Corn concentrate Aurelia and buckwheat concentrate Fagovita were developed on the basis of these two cereal crops, respectively. The materials do not contain cholesterol and their glycemic index is low to moderate. It is also important to emphasize that they are rich in omega 3 and omega 6 acids. Naše Klasje won two prizes in 2007 – a gold medal for the quality of Međimurka in Novi Sad, and first prize from the Foundation "Izvorno Hrvatsko" for the production of quality Croatian products and the creation of their image on both domestic and foreign markets. The company also won three prizes in 2006: a gold medal for Aurelia in Novi Sad, the Big Gold Medal for the quality of Zagora in Novi Sad, and the Acknowledgement of the Faculty of Food Technology and Biotechnology in Zagreb for its long lasting successful collaboration and great contribution to promoting higher education, science, and the field of profession.

### Product Aurelia

**About** Aurelia is an innovative product which allows for a short production process. Bakery products made from Aurelia have a characteristic aroma and colour, longer freshness and expiration dates, as well as bigger volume and texture in comparison to corn bread produced in a traditional way. Aurelia is a good source of antioxidant  $\beta$ -carotene.

## About

The company was founded in 1991, and its main activity is manufacturing finished, semi-finished, frozen and packaged bakery and confectionery products. The building is spread over 2000 square meters, plus 2200 square meters of land and 400 square meters of other commercial buildings. While their main business is done with domestic shopping malls, they also work with the foreign market, such as Lidl Germany and Austria. The standards this company possesses are:

- HACCP
- FSSC 22000
- IFS Food

Today, Pekar Tomo employs 280 people in production, who work in three shifts. There are also eight nutritional biotechnologists, seven commercial workers and 26 drivers. Products are delivered daily to Ilok, Beli Manastir, Donji Miholjac, Slatina, Novska, Slavonski Brod, Županja and Lipovac. These are all towns in the Croatian region of Slavonia. Frozen product delivery stretches beyond Croatian borders, to the neighbouring country Slovenia.

About

Sardina is a company that deals with fishing, processing and preserving fish, and the cultivation of related products at their breeding sites. With a 100-year-long tradition of conducting business, Sardina is one of the leading Croatian companies in the fishing and fish-processing sector and has a strong emphasis on the export of their products. The company established its headquarters in Postira on the Island of Brač. Its new manufacturing facilities are a further confirmation of its continuous efforts to provide its buyers from all over Europe and the world with the best possible products. The company uses the latest technology in fish production, while also taking care of the environment and natural resources. It closely follows the highest ecological and quality control standards, as demonstrated by its many certifications (ISOO 9001:2000, HACCP and IFS). Sardina has diverse production, which includes canned fish, fish pâté, frozen fish and fresh aquaculture products, as well as fishmeal and fish oil. The manufacturing process is based on sardines and other varieties of small and large oily fish caught with our own fishing fleet. Annual production capacities amount to 40,000,000 fish cans and pates, 500 tons of fish meal, 100 tons of fish oil and 1500 tons of high quality farmed fish. Sardina is a modern, successful company that strives to leave its mark in a range of activities on all five continents to which it exports its products, and to maintain a high quality at the level of world-famous fish producers. A successful team of managers and experts, decades-long experience in mariculture and processing, and continuous development ensure the quality of production to the satisfaction of the consumers of Sardina products.

About

In 2004 and 2005, this company planted a total of 120 000 vines. In four-teen years of wine production, they have won more than 50 awards and have spread their products to more than 30 countries. The vineyards stretch over 18 hectares of land, while the rest of the land is currently being prepared for the process of planting new vineyards, as soon as new market demand appears. Many eco standards are being met and continu-ally followed, such as a fair and sensible relationship with the soil, environ-ment and, finally, wines. All of this can be thoroughly seen and tasted in a glass of our wine. Vine protection is also ecological and the company has certificates that prove this. The vineyards are planted relatively densely, with about 7,000 vines per hectare, in order to put a lesser burden on each individual vine. The result is high quality grapes with a large share of the total extract of wine, perfect for producing excellent wines and wines that have a long life. Another result of a small vine load is a much longer lifetime for the vineyards and greater resistance to vine diseases. From the current vineyards, the company produces about 200,000 kilograms of grapes per year. The grape harvest is done solely by hand, in the tra-ditional way.

## About

Aronia Life is a company whose primary purpose is the production of chokeberries (aronia) and processing and sales of the same, in environmentally friendly conditions which are ecologically certified. The company established its base on the family farm by co-founder Darko Milinkovic, and consists of 1 ha of land in Šarengrad, Ilok, Croatia. In April 2014, 2000 two-year-old chokeberry plants (Nero type) were planted. In 2016, crops increased by 1.5 ha of land planted with seedlings of 3300 three-year-old chokeberry plants (Nero type). The Company Aronia Life was founded in Šarengrad as a joint business of two co-founders. As a result of their desire to start their own business venture, as well as the compatibility of their knowledge, skills and business experience, they founded a joint company. Organic farming, top quality with target processing and sales is their mission. Their vision is to offer unique products with a distinctive high quality and reasonable prices.

## About

The company's headquarters are in Blato on the Island of Korčula, where, from the very beginning, business has been based on the production, processing and sale of wine and extra virgin olive oil, the purchase of dried figs and carob and their processing into special brandies. Blato 1902 has in its possession a production area of approximately 10 ha of Korčula's wine region, where the amount of effort and resources invested combined with the favourable climatic conditions of Southern Dalmatia result in grapes of the highest quality, which are used to produce premium quality wines. The varieties grown are the native varieties of Korčula, such as Plavac Mali, Cetinka, Pošip, Maraštin and Zlatarica Blatska, as well as other varieties recognized worldwide – Merlot, Syrah, Malbec, etc. Apart from agricultural production, Blato 1902 PLC. is also active in the restaurant industry and commerce; we have wine cellars and well-known restaurants and catering businesses in Zagreb and Rijeka, recognizable for their Mediterranean cuisine and top-quality service. The continuity of the century-old business is in itself proof that the combination of tradition and modern technology is the ideal recipe for the production of top-quality products.

### Product About

Wine type: Premium quality dry white wine; Vintage: 2017; Variety: Pošip; Position/Terroir: Korčula; Alcohol content: 13,0 %; Volume: 0,75 lit. The premium quality Pošip from Blato is a shiny, clear, straw-yellow wine with a greenish-silvery reflection. Full-bodied and dense, it leaves a thick coating on the glass. Its initial aroma is sea scented. It opens gradually and then becomes smoky with a dry fig scent.

### Product About

Wine type: Premium quality dry red wine; Vintage: 2015; Variety: Plavac mali; Position/Terroir: Korčula; Alcohol content: 13,0 %; Volume: 0,75 lit. Plavac Blato is a premium quality, fiery, ruby red coloured wine, produced from the "plavac mali" grape variety, grown on the terraces and slanting edges of fields. We recommend drinking it by the sea, in the pleasant atmosphere of Blato's fish restaurants.

## About

The company's history dates back to 1911 in Zagreb, starting with Union and continuing to this day. Kraš has been the leading manufacturer of confectionery in Southeast Europe for many years thanks to its quality, tradition and strong brands. Apart from the Zagreb-based factories, Kraš also owns two biscuit and wafer factories: Karolina d.o.o., Osijek, situated in Croatia, and Mira a.d., Prijedor, operating in Bosnia and Herzegovina. It is through merging that Kraš has achieved its strategic goal of significantly increasing its share in the regional biscuit and wafer market, thus fulfilling the prerequisites for generating stronger sales of this range in other export markets. Due to its cutting-edge manufacturing facilities combined with the knowledge and rich experience of its experts, Kraš has obtained its position by manufacturing high-quality treats and growing original brands. Kraš brands not only occupy the leading positions in their respective product categories, but are also among the strongest brands within the FCMG categories. Managing long-lasting and unique assets by way of their adaptation to the modern environment lies at the core of Kraš' story. Over the years, the flagship brands of Kraš have evolved, adapted and have been given new looks, while continuously maintaining relationships with consumers and fulfilling their needs. The entire operations are run according to international standards and the strictest requirements to achieve premium quality. More than half of the total output is sold on the domestic market, while the rest is exported.

## About

Frigus Vecla is an ice-cream company that uses the brand name Gelati d'Oro. The name Gelati d'Oro derives from the Ancient Roman name for the Island of Krk, which was Isola d'Oro or Insula Aurea (meaning Golden Island). The Island of Krk, precisely the Town of Krk, has been home to this ice-cream brand since 2004. In 2015, the company used the name Gelati d'Oro NATURA in order to promote completely natural ice-creams with organic ingredients (without any additives, aromas, artificial colourings, etc.), exclusively using rice-flour, plant fibres and egg yolk as an emulsifier. The creaminess is achieved through a high dosage of skimmed milk. There is also no gluten in any of the products and fruit ice-cream does not contain lactose. Its rich taste is achieved through the usage of top ingredients. Some of the company's top products are Vanilla Bourbon Madagascar BIO, Kakao Dominicana BIO Fairtrade, and Hazelnut Piemonte IGP.

About

Clarum is a food production company that has been primarily producing dry pasta and filo dough for pies, strudels and rolls (filo dough – Strudelteig) since 2007. Products are frozen and ready to bake. Clarum is an excellent outsourcing partner because of its Just-In-Time system operations, flexibility and high efficiency, and due to successful collaboration with large Croatian food industries such as Podravka. Clarum manufactures a variety of brands for individual retail chains (Metro, Rewe, Spar, Kaufland). The company is continually very successful and up-to-date due to constant investment in the market, facilities and equipment, thus producing a quality and competent workforce. It is currently in possession of several certificates justifying its outstanding quality, some of which are the Gold Medal for the quality of dry pasta in the Pasta Festival and the Halal Certificate, ISO 9001:2008, ISO 22000:2005, HACCP.

## About

Žito Group is the leading trade and agriculture company in the eastern part of Croatia. It was founded in 1992 and has over 1600 employees today. We grow cereals and oilseeds in our own fields. These are the basic raw materials in our industries – the production of Tena oil, Premijer sugar, Tena flour and Vitalka animal feed. The storage capacities of 300.000 t are the basis for maintaining the quality of grain and oilseeds. Farming is one of the most important activities of the Group. It consists of 6 pig farms (highly specialized from the reproduction stage to the fattening phase, with the production of 150,000 pigs per year), 3 dairy farms and 2 farms for cattle fattening. Žito is also the largest egg producer in Croatia with an annual production of 62 million eggs. The Žito Group industry consists of a sugar factory, an oil factory, a wheat and corn mill, a seed processing plant, an animal feed factory, biogas production plants and a meat industry. Meat from our own pigs is the base for the Žito meat industry that has the capacity of producing 150.000 prosciuttos, 3.000 t of cured salami and 2.200 t of other cured products that are presented on the market under the brand DOBRO.
