

DIT Zagreb Tech Workshop – 11 March 2021

by the UK's Department for International Trade and Algebra LAB

The UK's digital tech sector is one of the best performing sectors in the UK with an annual turnover of £184 billion. It expands 2.6x faster than the rest of the economy. The total venture capital investment in tech was £10.1 billion in 2019 – more than in any other European country. UK consumers are early adopters driven by use of cloud, data analytics and artificial intelligence.

If you are an **agile**, **fast-growing tech company**, **start-up**, **scale-up or SME** interested in setting up in the UK market, don't miss this interactive afternoon session to meet our technology and business experts.
